

I want to petition about VRS services... I want to input my voice because VRS services has made an impact in my life and have seen the same with other deaf people. VRS service helped me to feel more connected with the hearing person whom I called. Please keep the service open and available for the deaf community. I always like to have a visual contact instead of typing through TTY. It made things easier with deaf people as they are some not good in English... they could sign in their native language and the VRS interpreter can translate to English. It is a wonderful service. Thank you for setting it up; please don't let it fall apart.

Thank you.
